

Assignment Name : To Formulating a Training Package for Adolescent Health Counselor
(Feb 2013- ongoing)

Geographical Area: India

Funder: WHO

Goals : To formulate a training package for adolescents health counselors

Objectives:

- * To develop a Comprehensive Counseling Manual for Adolescent Health and Development (for facilitators and participants) of Integrated Counseling and Testing center, Accredited Social health Activist (ASHAs) and Anganwadi workers (AWWs) on adolescent health and development. (including sexual health, emotional health, vocational development, and empowerment in life)
- * To ensure that "Package content" will have all communication modalities for adolescents, including reading-writing, listing, audio and visual forms which can be used/ delivered anywhere within a short interval of time.
- * To ensure appropriate integration of region specific environmental contents across the country, the manual will provide essential guidelines for the counselors and audience separately.
- * To take into consideration universal application of this Manual, within the backdrop of the regional imbalance, region-wise brainstorming workshops will be conducted with adolescents and "providers" across the state.
- * To bring into a common platform, a "think-tank" of core group of professionals from the different part of countries will be enabled to understand the views of various social, cultural and geographical group societies, and a strong technical module for adolescents.
